

**Judd Ranch, Inc.**

44th

# **Bull Sale**

**March 5, 2022**

**12:00 Noon**

**Judd Ranch, Inc.**

**Pomona, Kansas**

**FREE TRUCKING** — When your purchases total \$20,000 or more, JRI will truck your bulls FREE within the continental United States and JRI delivers directly to your door, not to some central location miles away from you. \$20,000 or more going out of the 48 states will be trucked free of charge to the border. On purchases of less than \$20,000 trucking is usually very affordable because Judd Ranch bulls annually sell into 20 plus states.

**QUALITY ACCEPTANCE GUARANTEE** — JRI wants you to check out the bulls and see them for yourself. Thus, you will be reimbursed for your travel expenses if you arrive at the sale and don't find the sale bulls as described to you by our phone conversation. This is the only such money-back guarantee in the industry!

**CUSTOMER APPRECIATION HAMBURGER FRY March 4** — To express our appreciation for your interest in our bull sale, we'd like you to join us for a complimentary pre-sale hamburger fry at the Ranch. We invite you to come early on Friday afternoon to view the bulls, then join us for a grab-and-go meal. Tables will be setup to enjoy the meal and hamburgers will start coming off the grill around 5 p.m. and will continue to be served until 7:30 p.m.

**SALE DAY LUNCH** — Be our guests at the Judd Ranch. Complimentary lunch will be served at 11:00.

**TRAVEL** — Judd Ranch is located 1½ to 2 hours from Kansas City MCI Airport. Private landing at Ottawa Municipal Airport located three miles south of Ottawa and 15 minutes from Judd Ranch, Ottawa Municipal Airport phone (785) 242-5310.

**RANCH LOCATION** — 2 miles west of Pomona, Ks. on Hwy. K-68, or 12 miles west of Ottawa, KS on Hwy. K-68.

**ACCOMODATIONS** — Please call by February 28 and ask for reserved Judd Ranch Bull Sale rooms. All motels are located at the south end of Ottawa. From interstate 35 take Exit 183B north to the first stop light. turn right. **From Judd Ranch:** Go east to Ottawa on K-68 highway. At the west edge of Ottawa K-68 goes north...at that point turn south (right) on Eisenhower Rd. 2 miles to 23rd St. Go east (left) on 23rd St. one mile through traffic light and all four motel accomodations are located immediately to your right.

#### **Sale Motel Headquarters**

Comfort Inn-Ottawa (785) 242-6150 or (785)242-9898  
2335 Oak Street, Ottawa, KS

The Comfort Inn is a nice clean facility with an indoor pool and offers a complimentary breakfast including eggs, sausage and biscuits, waffles, coffee and fruit juice. Applebee's Restaurant is within walking distance. We highly recommend this new facility and please ask for the Judd Ranch Bull Sale special reserved rooms when calling for reservations before February 28.

#### **Alternative Accommodations**

Holiday Inn - Ottawa (785) 521-7009  
Best Western - Ottawa (785) 242-2224  
Econolodge - Ottawa (785) 242-3400  
Super 8 - Ottawa (785) 242-5551

**INSURANCE** — Buyers, to protect your buying interest, shipping insurance is offered at settlement time. On our Free Delivery on purchases of \$20,000 or more we encourage you to purchase insurance. Our haulers have insurance but this insurance only covers the commercial value of your animals. Shipping insurance only covers death of the animal but given the minimal cost of such insurance we'd encourage all buyers to purchase it.

**SIGHT UNSEEN PURCHASES** — If you can't attend the sale and you want to buy, call: Judd Ranch Sale Consultant Roger Gatz (800) 743-0026 about our "Guaranteed to Please" Purchasing Agreement. Annually 25% of our gross sales are purchased through this time and money saving program. All bulls are guaranteed to meet your approval or you don't own them.

**DNA Testing**-Any animal DNA tested for homozygous black that are known red carriers will be designated with (RC). Any animal DNA tested for homozygous polled that are known to be heterozygous polled will be designated with (HP) at the end of the animal footnotes. Judd Ranch is retaining a 1/2 semen interest on all bulls selling. You are buying full possession and have the right to sell your bull at any time. If you decide to collect and sell semen Judd Ranch would receive 1/2 of the semen royalties. If Judd Ranch sells semen on said bull you would receive a 1/2 semen royalty.

---

On behalf of our committed family; welcome to the 44th Judd Ranch Herd Bull Sale. This year we will be selling 293 head and feel the 2022 offering to be the most uniform, extremely sound, highly functional, very fertile set of herd bulls with the most genetic potential ever at Judd Ranch. As always, all the top bulls have been saved for sale day, including our 2022 National Gelbvieh & Balancer Pen Show Grand Champion Pen of Five Gelbvieh, Reserve Champion Pen of Three Gelbvieh, Grand Champion Pen of Five Balancer Bulls and Grand Champion Pen of Three Balancer Bulls.

At Judd Ranch we strive to produce and provide our highly valued customers with powerful genetics that have built-in basic fundamentals which defy the odds on antagonistic traits of which are geared for crossbreeding programs and act as a catalyst to produce progeny that are optimal and highly profitable for all sectors of the industry. We are proud of the genetic uniformity and balance of traits the Judd Ranch herd has achieved by stacking generations of like phenotypes and genotypes. We feel bulls that have stacked like pedigrees are the key to a predictable balanced gene pool that possess the prepotency to sire predictable uniformity in multiple traits. Therefore, we are confident the Judd Ranch bulls of today are a complete package of superior genetics that should breed true. Every bull has passed a breeding soundness exam and is guaranteed to breed cows and, as always, we stand behind each and every bull.

#### **Facts and Statistics of 2022 Sale Offering**

**BSE** Every bull in the sale has passed a breeding soundness exam (BSE) performed by Dr. Mages in February. However, we recommend a BSE just prior to turn out with cows. Especially if you are relying on a single bull per group of cows.

**IMF SCORES** 4.2 IMF Average for the Spring Bulls with 0.31 back fat and 3.4 IMF Average for the Fall Bulls with 0.18 back fat.

**Frame Size** Average 365 day adjusted frame score for Fall Sale Bulls, 5.6 and, 5.5 for all Spring Bulls. There should be bulls within most people's parameters for frame size.

**Birth Weight And Calving ease Status** 81 lbs. average on Fall Bulls, 83 lbs. average on Spring Bulls, gestation length has also shortened a lot over the years which also helps to reduce birth weight.

**205 Day Weight** Fall Sale Bulls average 781 pounds 205 adjusted weight and an average actual weaning weight of 894 pounds off the cow. Spring Sale Bulls average 720 pounds 205 adjusted weight and average actual weaning weight of 816 pounds off the cow.

**Cows Actual % of Body Weight Weaned** Fall Gelbvieh Cows with Bull Calves average 57%. Fall First calf Gelbvieh averaged 63%. Spring Gelbvieh Cows with Bull calves average 61%. Spring first calf cows with bull calves average 67%. We do not use any adjustments for the calf's age as we feel the cows that calve earlier in the season should get an advantage for fertility.

**365 Day Weight Average** for Fall Sale Bulls 1,195 pounds and Spring Sale Bulls 1,234 pounds.

**Average Daily Gain on Test** 5.14 ADG for all Fall Sale Bulls. 4.10 ADG for all Spring Sale Bulls. The bulls are weighed in right off the cow at weaning (no shrink applied, no warm up) and fed a high roughage ration which includes prairie hay, corn silage, alfalfa haylage and corn.

**Adjusted 365 Day Ribeye Area** 15.5 square inch average for Spring Sale Bulls and 14.3 square inch average for Fall Sale Bulls. 1.1 square inch of ribeye per 100 pounds of body weight off test, which is right on track.

**365 Day Average Scrotal Circumference** 37.7 cm Fall Bulls. 37.5 cm Spring Bulls. We feel large scrotals provide added fertility to females and males, along with early puberty on heifers.

**Adjusted 365 Day Pelvis** 184 cm Average on Fall Sale Bulls. 183 cm Average on Spring Sale Bulls.

**Dam of Merit/ Dam of Distinction Status** 100% of the Gelbvieh and Balancer sale bulls feature Judd Ranch honored DOM and or DOD cow family genetics.

**Structural Soundness** Freedom of movement and hoof size and correctness are traits we check closely and breed for. Also we run the Fall Bulls in large pastures after gain test, August – November, with no supplement feed. We feel this helps soundness and teaches the boys to get out and cover the country and learn to hunt for a living.

**Polled/Homozygous Polled Status** 100% of the sale bulls are polled. There are 277 head of homozygous polled bulls in the offering and 183 head of black polled bulls.

**Disposition Status** We also watch temperament closely at Judd Ranch and don't believe you will find a more docile set of bulls anywhere. However, there are usually a few bulls in the offering that we feel are not as docile as we prefer and will be announced as group bulls from the auction block.

**PI BVD** Judd Ranch has tested almost every calf (bulls and heifers) for the past 13 years and have all been negative. And all sale bulls are tested negative for PI BVD.

**Johnes** Judd Ranch is currently an Accredited Level 4 Johnes Free Status. Herd # 860580124

**Brucellosis** Judd Ranch is an Accredited Brucellosis Free Herd Certification #271. All cows and herd bulls are tested annually.

**Trichomonas Testing** We realize there are some states requiring a negative trich test on most bulls entering their state. **We recommend those of you from out of state please check your state's requirements before bringing your trailer as it takes a few days to complete the testing if required.**

One of Gelbvieh's biggest strengths is the cow power of the female. Yes, the Gelbvieh cow has the ability to raise scale smashing calves and be pregnant on schedule with another calf. Lee Leachman's data on over 200,000 cow records, of all breeds, puts Gelbvieh influence females number one for pounds of calf weaned per cow exposed every time. Also, Gelbvieh and Balancers cross extremely well with other breeds, as Gelbvieh and Balancer bring fertility, milk, reduced cow size, pounds of calf, good disposition, and optimum birth weight to the equation.

Cindy and I would extend a huge thank you to all our friends, neighbors, and crew who help with the sale and throughout the year! Especially, Roger and Peggy Gatz of Cattlemen's Connection for all their expertise, hard work and dedication to the Judd Ranch program, for 36 years. I would also like to extend a huge thank you to my family for their hard work and dedication to producing high quality seedstock. It takes all of us including Cindy, Nick, Ginger, Brent and Ashley putting in long hours and hard days doing all of the extra jobs that it takes to make a seedstock operation run smoothly. Just some of dotting the I's and crossing the t's include weighing and tattooing every calf, artificially inseminating every cow, running our embryo transfer program, preparing pen bulls and sale cattle, extra herd testing for health and fertility, accurate record keeping, feed production and storage, building fence and water systems and equipment and truck repair. Cindy and I are very proud of our family and appreciate all their hard work toward making Judd Ranch a success.

We are extremely grateful for our customers who are both great folks and some of the best cow people from across the country. Through the years many of you have become both our customers and very good friends. It is truly an honor and privilege to be your genetic supplier. It is always a pleasure to work with people who have a true appreciation for the land, the lifestyle and the almighty COW. You folks are to be commended for the tremendous job you do with your outfits and cowherds. You deserve the best and we wish you all the best. We hope you can make plans to come Friday, view the bulls and then join us for our annual customer appreciation hamburger fry. Tables will be set up to enjoy the meal and hamburgers will start coming off the grill around 5 p.m. and will continue to be served until 7:30 p.m.

Sincerely,

*Dave & Cindy  
& Crew*

**CATTLEMEN'S  
CONNECTION**

Dear Cattle Producers:

It has been my pleasure to work with the Judd Ranch crew for over thirty years. Just a couple of reasons I like working for Dave, Cindy and their family are their honesty and how hard they work every day. A handshake from Dave Judd is better than a legal contract with many others.

Producers, because I think buying quality bulls for your program is such an important process, I want you to consider some vital keys to selecting your next seedstock supplier. When you combine Dave Judd's honesty, accurate record keeping, practical approach to breeding functional purebred cattle, his overall knowledge of all phases of the livestock industry, you have a superior seedstock supplier. One of the main reasons so many Judd Ranch customers return to purchase their bulls every year is because they trust the honesty and integrity that are the foundation to the Judd Ranch program. Another important reason to choose Judd Ranch as your genetic supplier is the strength of the cowherd or true Cow Power featured at Judd Ranch. As you look through this catalog, you will find several photos of Judd Ranch females and please notice they are easy fleshing, deep-ribbed, calf raising machines with incredible teat and udder quality. Also note, all females photographed in this catalog are Judd Ranch bred.

Judd Ranch has been honored as the #1 Dam of Merit program in the Gelbvieh breed for 21 of the past 24 years ('98-'21). Dam of Merit females are honored for their unsurpassed fertility and performance levels. As always, AI continues to be an integral part of the Judd Ranch program and you will note 99% of the bulls in this offering, are sired by breed leading proven AI sires. This combination of Judd Ranch's honored Dam of Merit females and proven breed leading AI sires offers you tremendous financial rewards in your next calf crop, and you will realize even more substantial benefits when you incorporate Judd Ranch Gelbvieh genetics into in your base cowherd.

If you have questions about any bull listed in this sale catalog or would like assistance in selecting bulls for your program; please give me a call toll-free 1-800/743-0026. Prior to the sale I personally go through and grade each sale bull and write detailed physical notes on each. This process usually takes five to six days. If you are unable to attend the sale, I will be happy to purchase a bull or several bulls for you, within your price range, and we will guarantee your satisfaction with the animal(s). Every year, approximately 25% of the gross sales are purchased through this free and time saving program, and you pay only the bid price, just as if you were bidding yourself.

You can reach me at 1-800-743-0026 or 785/547-6262 until February 27th, after then you can call me on my cell phone at 785/547-6262 during the day. In the evenings please call either my cell phone 785/547-6262 or the sale motel headquarters, Comfort Inn in Ottawa, Kansas 785/242-6150.

Respectfully,

*Roger*

## Cottonwood Animal Hospital

LARRY E. MAGES, D.V.M.  
TRENT A. LANCASTER, D.V.M.

LAURA E. ERWIN, D.V.M.  
RANCE P. ERWIN, D.V.M.

3161 HWY. K-68  
OTTAWA, KANSAS 66067  
PHONE: (785) 242-7822  
FAX: (785) 242-0216

Dear Cattlemen,

This is my 34 year working with Judd Ranch on herd health and fertility checking bulls. All bulls offered for sale in March have passed a Breeding Soundness Examination (BSE) based on the following criteria:

- Scrotal circumference and testicle examination.
- Pelvic measurement and checking for any abnormalities or medical problem in the reproductive glands.
- Electro-ejaculation to collect semen and examine the penis.
- Microscopic evaluation of sperm for motility and concentration.

All bulls have been tested for BVD-P I and are negative. The herd is a designated Brucellosis free herd and is negative to date in the Joh n e' s Disease (paratuberculosis) program. Trichomonas Foetus (Trich) is a reproductive disease that spreads from infected bulls to cows at breeding time and causes abortion.

Most all western states have made it mandatory to have bulls tested before entering the state. To date these states are requiring bulls over 12 months of age to be tested: Arizona, Idaho, Utah, Nevada, New Mexico and Texas. States requiring bulls over 18 months of age to be tested are: Alabama, California, Colorado, Florida, Georgia, M ississippi, Oklahoma, Virginia, Washington, Oregon, Tennessee, West Virginia, and Wyoming. **All bulls in the sale are virgin bulls and considered Trich free and will not be tested prior to sale. If you state requires Trich testing, the bulls will be tested after the sale and will be delivered or picked up once the testing is complete.**

Cattlemen, rarely do you have a chance to improve your profit and genetics at the same time. Without a doubt, one bull from this sale will improve your herd for years to come. These bulls will improve your herd in more ways than any other decision you will make and will make your herd more profitable.

Dave and I feel very strongly about the sale of healthy and sound bulls. We realize that by selling a bull that may be a questionable breeder we not only put the Judd Ranch reputation on the line but we may be destroying a calf crop. Only sound bulls will be offered for sale. I strongly recommend that although these bulls have passed a BSE in January and February, they be re-examined prior to turn-out this spring.

If you have any questions regarding the health of these bulls and this herd, please feel free to contact me prior to the sale at (785) 242-7822 or (785) 248-6225.

UI look forward to seeing you at the sale and good luck this calving season.

Sincerely,

Larry E. Mages, DVM

## Ultra Sound Technologies

Ultrasound Technologies  
Chad Gordon  
P.O. Box 413  
Fletcher, OK 73541  
chadgordon8g@gmail.com  
580.678.1918

To Whom it may concern:

Traveling the country over the past 20 years Ultrasounding Cattle I have seen many different types and breeds of cattle that vary greatly in carcass traits and phenotypic quality. I have Ultrasounded the bulls for the last several years and have seen that Judd Ranch Bulls possess exceptional carcass traits in a very functional package. It has always been exciting for me to evaluate cattle of any breed and what they offer to the Beef Industry.

On March 5 cattlemen will have the opportunity to purchase genetics that will improve any herd, whether you are a seedstock producer or a commercial producer that retains ownership of your calves through finishing you will find bulls that will fit your program. It has been proven that 1 square inch of Ribeye area per hundred pounds of body weight to be average for muscling. The Judd Ranch Bulls will greatly exceed that while maintaining high %IMF values. Translation, these bulls will add muscle in their offspring lowering numerical yield grades while still maintaining optimal quality grades. As we move to more challenging market conditions it is critical that producers find genetics that are efficient and have the ability to produce pounds of product in a timely fashion. Cattlemen will certainly find these genetics at Judd Ranch on March 5.

It is always my pleasure to go to Judd Ranch to ultrasound bulls that are very quiet in disposition while working with an outstanding family. As you make your selections for purchase buy with confidence, you are not only buying quality bulls, you are buying from a program that will work in any operation that has been time tested to produce superior cattle and the Judd's will stand behind them.

Best Wishes,

Chad Gordon

# LiveAuctions.TV

*"Because Every Bid. Counts"*

THE FASTEST REAL-TIME ONLINE BROADCASTING BIDDING AND VIEWING

- Go to [www.liveauctions.tv](http://www.liveauctions.tv)
- Find your sale (listed in date order)
- Click "watch this event" (will take you to login page)
- If you have an account log in, if not click "create new user"

After logging in, you are able to view the sale. If planning to bid, register for a buyer number by clicking "register for a buyer number" in the top right-hand corner. Fill out the registration information, and click "register now". You will then be "pending approval". Once approved, a bidder status approval email will be received and the bidding number will appear in the top right of the sale page. We recommend registering for a buyer number at least 24 hours in advance of an auction. Sale day requests may still be accommodated.

**Buyers** :: post sale, contact the sale host or management team for payment & shipping

**Proxy Bidding** :: for those not able to watch in real-time, bids can be placed using the blue video tabs on the right of the log in screen.

**Support** :: for support during the sale broadcast, chat live with one of our representatives. Otherwise, our support team is available @ 800-431-4452

For those users on a phone or tablet download the LiveAuctions.TV App

LiveAuctions.TV

**(817) 725-8595**

## Another Option...Use Our Sale Day Conference Line

Of course, our preference is to have you join us in Pomona on March 5, but we understand traveling is not an option for all of our customers. Along with being able to watch and bid on LiveAuctions.tv, we will also have a Sale Day Conference line that customers can call in on and bid.

1. If you wish to bid by phone, please call Ashley Judd at 785-248-6005 or Ginger Judd 785-229-9266, so we can assign you a bidder number and give you the sale day conference line number. We recommend you call at least by Friday, March 4 to get your bidder number. In case of an emergency, Saturday morning requests can be accommodated.
2. On sale day, call the conference line number. Sale starts at 12:00 (noon) Central Time. We will have a representative standing by to assist you on the conference line, starting approximately 15 minutes before the sale starts.
3. Once you are on the line, state your name and bidder number to the Judd Ranch representative so that we know you are on the line.
4. When you are ready to bid, say "yes" and your bidder number. For example, if your bidder number is 230, you will say "yes, bidder 230" when you are wanting to bid.
5. If you are the winning bidder, our representative will tell you that you bought the animal, and you will be contacted by Judd Ranch after the sale regarding payment, animal pick up or delivery.
6. If you would like to mute your line, dial \*6. To unmute your line, dial \*6 again.

# JUDD RANCH REFERENCE SIRES/AI REFERENCE SIRES

*JRI Prescribed Remedy 253E38*

## **JRI Herdsire** Homozygous Polled (75%) Balancer **JRI Prescribed Remedy 253E38**

1386931 Tattoo: 253E38 BD: 2/9/17 BW: 82 WW: 738 YW: 1,146

**JRI General Patton 213B97 ET**  
**JRI Ms Extravagant 213T87** (JRI Ms 213R77)  
**Mytty In Focus** (Countess 906)  
**JRI Ms Special Blend 253W28**  
**JRI Ms Strawberry 253T8** (JRI Ms 253L71)

■ Wow, you talk about a calving ease/meatwagon Judd Ranch herdsire who's producing phenomenal progeny. Prescribed Remedy's incredible dam JRI Ms Special Blend 253W28 was honored three consecutive years as a Dam of Merit female and wowsa, Special Blend has been a one-of-a-kind producer. Special Blend's first calf JRI Ms Lucy 253Y38 is one of Judd Ranch's elite donor females and Ms Lucy's first calf was JRI Ms Victoria Secret 253A48 who happens to be the incredible dam of the herdsire JRI Overachiever 253E39. Special Blend daughters and granddaughters are phenomenal producers, now pencil-in Special Blend's ability to produce calving ease/powerhouse sons as Special Blend's first son JRI Secret Password 253Z38 sold in the 2013 bull sale and the super stud reigned as the 2014 Canadian National Champion Bull.

*JRI Painted Black 254C741*

## **JRI Herdsire** Black, Homozygous Polled Purebred **JRI Painted Black 254C741**

1333282 Tattoo: 254C741 BD: 8/20/15 BW: 85 WW: 756 YW: 1254

**JRI Top Secret 253M75 ET** (JRI Ms 253J60)

**JRI Ms Copy Cat 254R64**  
**JRI Ms Extra Exposure 254L53 ET** (JRI Ms 254A4)

■ JRI Painted Black 254C741 was Judd Ranch's pick of the fall 2015 born purebred Gelbvieh bulls and oh my, check out Painted Black's awesome stats: 85# birth weight, ripping 756# 205 day weight, whopping 1,054# actual weaning weight, scalebusting 1,254# 365 day weight. Now pencil-in this calving ease/meat machine's big ol' 16.3 square inch yearling ribeye coupled with a carcass-plus 4.1 IMF (120 IMF ratio). Painted Black's incredible 10-year-old honored Dam of Merit dam JRI Ms Copy Cat 254R64 was one of Judd Ranch's all-time great donor females with a carcass-plus 109 ribeye area/110 IMF ratio on her babies. Fertility, longevity, producing ability and carcass merit run mighty deep in Painted Black's pedigree as his honored Dam of Merit/Dam of Distinction granddam 254L53 featured a 103 ribeye area/110 IMF ratio on her 13 babies.

*JRI Secret Sensation 140A43*

## **JRI Reference Sire** Black, Homozygous Polled Purebred **JRI Secret Sensation 140A43**

1265115 Tattoo: 140A43 BD: 8/16/13 BW: 73 WW: 787 YW: 1,318

**JRI Maxxed Out 140W32**  
**JRI Ms Molly 140P52** (JRI Ms 140K52)

■ JRI Secret Sensation 140A43 was Dave Judd's pick of the fall 2013 Gelbvieh bull calves and wow, this calving ease/super stud posted some awesome stats: 73# birth weight, 787# 205 day weight, 1,060# actual weaning weight, 1,318# yearling weight, 16.9 square inch yearling ribeye with a 43.4 centimeter yearling scrotal. Man oh man, that's an awesome birth to growth spread and impressive spreads are a common occurrence with Secret Sensation's incredible honored Dam of Merit dam as her four natural born sons to date have posted the following averages: 73# birth weight, 758# 205 day weight, 970# actual weaning weight, 1,258# yearling weight with a 41.8 cm. yearling scrotal average. I might add, Secret Sensation's incredible dam JRI Maxxed Out 140W32 is one of Judd Ranch's elite donor females.

*JRI Marshall 214X2*

## **JRI Reference Sire** Black, Homozygous Polled (50%) Balancer **JRI Marshall 214X2**

1152366 Tattoo: 214X2 BD: 1/20/10 BW: 79 WW: 657 YW: 1273

**JRI Ms Black Secret 214U88**  
**JRI Ms Lucky Star 214R78 ET** (JRI Ms 214G6)

■ This breed leading powerhouse homozygous polled AI sire has worked fabulous at Judd Ranch in producing extreme calving ease coupled with performance plus growth. JRI Marshall 214X2 nursed a fertility-plus first calf heifer and I'd call his mama a calf raising machine as Marshall weaned off at 82% of her body weight and that's flat called Judd Ranch Cow Power. Marshall posted an awesome low birth to yearling growth spread with his calving ease deluxe 79 pound birth weight coupled with a scalebusting 1,273 pound yearling weight. Marshall's a breed trait leader for Calving Ease, (low) Birth Weight, Calving Ease Maternal, Docility, and Marbling. Marshall's calf raising machine dam was honored as a Dam of Merit female in her first year of eligibility and as an Elite Dam of Distinction honored female in her first year of eligibility.

■ JRI Transformer 254E44 sold in the 2018 bull sale and the meatwagon was a member of Judd Ranch's 2018 National Champion Pen of 3 Purebred Gelbvieh Bulls. Transformer nursed a first-calf heifer with an unmatched teat and udder system and he weaned off his first-calf dam at an amazing 85.6% of first-calf mama's bodyweight. Transformer posted a calving ease deluxe 79 pound birthweight with a scalebusting 1,458 pound yearling weight growth spread. Calf raising machine/fertility-plus genetics run mighty deep in Transformer's pedigree as his grandams' 254P62, 254E52 and 254C4 all possess Dam of Merit/Dam of Distinction honors. **Photographed at 10 months of age.**

## Quotes from Judd Ranch Bull Buyers

-Judd Ranch genetics hit the mark in performance, frame score, and docility. "Holy cow, it is night and day difference," Justy says about his calves sired by Judd Ranch bulls. In one year we've improved weights by 100-lb. It's just amazing. - Justy Burleson, Ohio Commercial cow-calf producer

- With 100 to 150-pound increases in average weaning weights, Kansas cattle producer John Rose is a believer in the increased performance Judd Ranch bulls bring to a cow herd. Along with increased weaning weights, John says the calves are noticeably thicker and deeper-bodied. - John Rose, Kansas Commercial cow-calf producer

- "Our Judd Ranch sired calf crop averaged 150 to 200 pounds more at weaning than when we raised straight Angus calves. That sounds like a lot, but that is what the scales show. Judd Ranch bulls turned our calf crop around" - Bill & Dodi Dennis, Commercial cow-calf producers, Texas

- "I wanted some bulls, but it's a long way from western Oklahoma to Pomona so I gave Roger a call," Jack tells. "We talked. I mentioned some bulls I liked, and Roger gave me a few more to think about. Come sale day, I got three bulls- and got them for less money than I gave Roger." "I loved the three bulls purchased in 2014 so much that I used the Sight Unseen program again in 2015. And I got another super good bull. And I got him cheaper than I'd planned. That Sight Unseen program is a darn good one." - Jack Brown, Oklahoma

- "Better quality bulls lead to better quality calves." Says Todd Storts without hesitation. He says he found better quality bulls when he purchased his first Judd Ranch Bull in 2012. He recalls being overwhelmed by the quality when he attended his first Judd Ranch Bull Sale. "I had never seen that many good bulls in one spot at one time." He says using Judd Ranch bulls has increased weaning and yearling weights as well as helped him moderate cow size. "Since using Judd Ranch bulls our weaning weights have gone up and our yearling weights, have increased about 100 pounds." - Todd Storts, Commercial cow-calf producer, Missouri

- "Roger was extremely knowledgeable about every bull in the sale catalog," Dean states. "I appreciated his input and ended up giving him several bulls to bid on, instructing Roger to just buy one for me. He did such a good job four years ago that I used the Sight Unseen program again in 2016." Dean says he sorted through the sale catalog, then discussed his choices with Roger who, knowing Dean's program, encouraged him to look at another bull or two. In the end, Dean gave Roger money for one bull and three bulls to bid on. "I not only got my first choice for a lot less than I thought I would have to spend, but I like the bull-a black homozygous polled purebred Gelbvieh - so much that I'm going to have the bull collected and use him as an AI sire in my herd. Judd Ranch's Sight Unseen program is a real convenience - saving me time and money - and the bull that comes off the trailer is just as described over the phone to me - or even better." - Dean Duxbury, South Dakota.

- "I can't say enough good things about Judd Ranch. I bought my first bull in 1990 and now my whole herd is based on Judd genetics. Last year, because of those genetics, I weaned off bull calves that weighed more than 1,000 lb. My herd is proof that you can start with a group of bad cows and after years of buying Judd Ranch bulls you can have a herd you are proud of." - Joe Peine, Commercial cow-calf producer, Kansas

Wowza, you talk about a super stud who is flat loaded with profitable genetics! JRI Superstar 140H86 nursed a fertility-plus (365-day annual calving interval) 5-year-old mama who has been honored as a Dam of Merit female in every year of eligibility. Superstar's fertility-plus/ calf raising machine mama JRI Ms Perfect Replica 140C76 ET is photographed on page 18 and check out her photo and note her awesome teat and udder system. Superstar's full brother JRI In Good Company 140G86 sold in last year's sale as Lot 37 and the super stud featured a 75# birth weight, whopping 992# actual weaning weight, with a scalebusting 1,284# 365-day weight. Fertility, longevity, and calf raising machine genetics run mighty deep in Superstar's pedigree as his grandams' 140J53, 140F40, and 140B3 were also honored numerous times as Dam of Merit females.

Gather up these General Patton sons if you're in need of teat and udder improvement as the General Patton daughters in production feature unbelievable teat and udder structures. JRI Porterhouse 259H38K's replacement daughters should possess incredible teat and udder systems as Porterhouse is line-bred in the teat and udder department as his 6-year-old dam possesses a beautiful system. Unmatched fertility is standard equipment in the Judd Ranch program and this prolific Judd Ranch 259 cow family really excels in the fertility/ calf raising machine department. If you research Porterhouse's pedigree, his fertility-plus/ calf raising machine grandams' 259X28K, 259N8K, 259K7, 259D6, and 259B51 are all honored members of the elite Judd Ranch Dam of Merit club.

Wowza, check out the widespread birth to growth stats on this super stud and producers, Judd Ranch came mighty close to retaining this super stud as a herd sire. JRI The Patriot 279H40 nursed an awesome first-calf heifer and rest assured, fertility and calf raising machine ability runs mighty deep in Patriot's pedigree as his grandams' 279A20, 279Y90, 279J70 & 279X5 all have been granted Dam of Merit honors. Patriot offers you extreme calving ease with his 62# birth weight and his progeny should flat spread the growth as Patriot posted a whopping 847# 205-day weight with a scalebusting 935# actual weaning weight off his first-calf dam. Calving ease/meatwagon genetics and well endowed in the scrotal department like all Judd Ranch potential herd sires.

JRI Bacardi 213H187 ET would be an ET full brother to Lots 9, 48, and 64 and his donor dam's natural born son sells as Lot 12 and he's another full brother. Producers, Bacardi's incredible donor dam JRI Ms Mary Poppins 213A98 ET is photographed on page 23 in her working clothes and take special note of Ms Mary Poppins' exceptional teat and udder quality as a 7-year-old female. Ms Mary Poppins holds numerous Dam of Merit honors which comes as no surprise as her dam 213T87 and granddam 213G57 also belong to the elite Dam of Merit club. If you study pedigrees, you'll also note Ms Mary Poppins as an ET full sister to Judd Ranch's phenomenal herd sire JRI General Patton 213B97 ET who has 79 calving ease/ meat machine sons selling in this offering. These ET Mary Poppins sons are way off on ADG and I'm not sure why, but I can tell you that's not the norm as Mary Poppins' son in last year's sale featured a 6.06# ADG.

JRI Sizzler 176H50 nursed a fertility-plus 365-day annual calving interval 10-year-old mama who flat knows how to get pregnant and bring home the beef. Three hundred sixty-five-day annual calving interval 10-year-old females will flat put cash in the bank especially when they are weaning off scalebusting 1,025# babies like Sizzler. Unmatched fertility and producing ability run mighty deep in Sizzler's pedigree as his grandams' 176M70, 176J60, and 176D50 are all members of the elite Judd Ranch Dam of Merit honored sorority. Rest assured, the calving ease is bred-in Sizzler's pedigree as he features top 15% calving ease EPD strength and Sizzler should flat boost your performance and your all-important fertility levels. JRI Amarillo 148H90 nursed a 5-year-old fertile machine 348-day annual calving interval Top Gun daughter with a super teat and udder system. Amarillo's dam's remarkable 348-day annual calving interval comes as no surprise as her dam JRI Ms Juliet 148Y70 and grandam JRI Ms Eternal Echo 148K60 both feature Dam of Merit and breed elite Dam of Distinction honors. If you'd please turn back to page 15, I'd like to show you a photo of Amarillo's calf raising machine grandam JRI Ms Eternal Echo and take special note of the whopping bull calf nursing her. Oh, I might also add, longevity runs mighty deep in Amarillo's pedigree as Ms Eternal Echo produced scalebusting progeny for 15 years.

JRI Struttin My Stuff 285H809 is the natural born son out of JRI Ms Busy Bee 285Y709, Judd Ranch's phenomenal donor female. Ms Busy Bee has been honored as a Dam of Merit ('16-'19) and breed elite Dam of Distinction ('20-'21) female in every year of eligibility. If you'd please turn back to page 10, I'd like to show you a photo of Ms Busy Bee photographed as a first-calf heifer with her scalebusting bull calf at side. Producers, the bull calf at side in that photo featured an 80# birth weight, ripping 895# 205-day weight, whopping 1,015# actual weaning weight, with a scalebusting 1,341# 365-day weight. Struttin My Stuff did weigh 92 pounds at birth but don't shy away here as Ms Busy Bee's nine natural born calves have only averaged 80 pounds at birth.

JRI Spirit 017H5 nursed an 8-year-old fertile machine 363-day annual calving interval mama who has been honored as a Dam of Merit ('17-'20) and as a breed elite Dam of Distinction ('21) female in every year of eligibility. You're probably thinking that Spirit was twin born since he weighed 51 pounds at birth, but that's not the case here. I can tell you that Spirit's 8-year-old Dam of Distinction dam flat knows how to raise babies as her meat machine son JRI High Steaks 017G29 sold in last year's sale and the meat machine posted a scalebusting 960# actual weaning weight. Fertility and calf raising machine ability runs mighty deep in Spirit's pedigree as his grandams' 017M8, 017H7, 017C6, and 017Y5 were also honored Dam of Merit females.

JRI Afternoon Delight 176H4 would be the natural born son out of JRI Ms Sweet Adeline 176C3, Judd Ranch's awesome 5-year-old donor female. Ms Sweet Adeline has been honored as a Dam of Merit female in every year of eligibility (20-21). Ms Sweet Adeline usually strolls home with a heifer calf and that sure is not a problem as her first-calf daughter 176F4 (full sib to Afternoon Delight) raised a whopping 811# 205-day weight heifer calf. Fertility-plus/ calf raising machine genetics run mighty deep in Ms Sweet Adeline's pedigree as her 9-year-old dam JRI Ms Mocha 176Z20 features a 364-day annual calving interval. Oh, you can also pencil-in Ms Sweet Adeline's grandams' 176M70, 176J60, and 176D50 as Dam of Merit honored females.

Producers, if you're new to the Judd Ranch program you'll find the record keeping, honesty and integrity unmatched. If a calf weighs 90 pounds at birth such as JRI Raphael 246H45 the 90# birth weight is accurately recorded. Why Raphael weighed 90 pounds at birth is beyond me as his third-calf dam's first two babies only weighed 56 and 45 pounds at birth. Rest assured, Raphael offers you plenty of calving ease as Raphael features top 10% calving ease EPD strength and any geneticist will tell you, calving ease EPD strength is three times more accurate in predicting a bull's calving ease than actual birth weight. Fertility runs mighty deep in Raphael's pedigree as his grandams' 246P11, 246M9, 246H8, 246C6 & 246A5 all have received Dam of Merit honors.

JRI Preferred Stock 148H645 nursed a first-calf heifer with a picture perfect teat and udder and Preferred Stock's pedigree is flat loaded with cow power genetics. That's Preferred Stock's grandam JRI Ms Bella 148Y44 photographed on the left hand page as a first-calf heifer with her scalebusting bull calf at side. I might add the scalebusting bull calf photographed at the side of Ms Bella is Judd Ranch's calving powerhouse herd sire JRI Optimizer 148A24 who features a 72# birth weight, whopping 990# actual weaning weight and a scalebusting 1,316# yearling weight. As noted above, Preferred Stock's pedigree is loaded with cow power genetics as his grandams' 148Y44, 148U34, 148R63, 148J53, 148G4 & 148Y3 are all honored Dam of Merit females.

JRI Pyramid 02H12 nursed a 10-year-old fertility-plus 368-day annual calving interval Journey daughter JRI Ms Monaco 02X92. Producers, it's highly documented that fertility alone is 12 times more economically important than any trait in the beef industry and at Judd Ranch you're buying into an unmatched fertility system as Judd Ranch has been honored as the breed's No.1 Dam of Merit program for 21 of the past 24 years. Now let's key on the all-important longevity trait and when you double up fertility and longevity like Pyramid offers your program you should see a major impact in your fertility and longevity levels. I might add, expect superior teat and udder quality in Pyramid's replacement daughters as his 10-year-old dam features an excellent teat and udder system.

Some producers will probably shy away of JRI Patrick 285H893 because of his 91# birth weight and personally I believe that would be a mistake as his second-calf dam JRI Ms Sparkling Gem 285E793 normally excels in extreme low birth weight babies. Ms Sparkling Gem's first baby only weighed 75 pounds at birth and her fall 2021 baby (full sib to Patrick) only weighed 66 pounds at birth. Patrick does carry a little more birth weight but you should be well rewarded with the performance levels this beef machine is capable of producing. If you would turn back to page 10, that's Patrick's grandam 285Y709 photographed as a first-calf heifer with her meatwagon 1,015# actual weaning weight bull calf at side.

JRI Poncho 9H357 ET is an ET son out of JRI Ms Sweet Adeline 9X25 Judd Ranch's calf raising machine, fertile plus 10-year-old donor female. Ms Sweet Adeline is one fertile machine with a 368-day actual calving interval which is truly awesome as she was producing multiple ET calves during that same period of time. Now let's key on Ms Sweet Adeline's calf raising machine ability as to date her four powerhouse natural born sons have averaged a whopping 948 pounds on actual weaning weight. Ms Sweet Adeline's last natural born son JRI Essentials 9G350 (full sib to Poncho) sold in last year's sale as Lot 21 and the meatpacking machine featured a 77# birth weight, whopping 918# actual weaning weight with a feeder delite 6# ADG. Oh my, check out the awesome stats on this meat machine General Patton son: calving ease deluxe 75# birth weight, whopping 920# actual weaning weight, big-time 5.42# gainer with a big ol' 16.3 square inch yearling ribeye. JRI Proud American nursed an 8-year-old fertility-plus (363-day annual calving interval) Mytty In Focus daughter. Proud American's dam definitely excels in the fertility department and man oh man, she is loaded with cow efficiency as Proud American's whopping 920# actual weaning weight equates to 75.1% of his 8-year-old mama's 1,225# bodyweight. Proud American's dam's remarkable fertility and cow efficiency comes as no surprise as her grandams' 213F50 & 213B4 are both honored Dam of Merit/Dam of Distinction females.

JRI Bullwinkle 285H310 features a little more birth weight, but producers, if you're in need of more performance, fertility and maternal strength in your program, Bullwinkle is your man. Let's touch on performance first as Bullwinkle flat pounded the 205-day weight scales at 893 pounds and the meatwagon posted an actual 1,055# weaning weight off his 8-year-old dam. Now let's key on the all-important fertility and maternal strength. Bullwinkle's 8-year-old dam features a mighty impressive 368-day annual calving interval which comes as no surprise as her dam 285W709 and grandams' 285R609 & 285F509 are all members of the elite Judd Ranch honored Dam of Merit sorority.

JRI Omaha 406H38 stems from the fertility-plus Judd Ranch 406 cow family which already features fifteen Dam of Merit honored daughters. If you trace Omaha's maternal side, you'll find four of those fertility-plus/calf raising machine Dam of Merit honored 406 daughters as Omaha's grandams' 406S27, 406J15, 406F14 & 406C14. Omaha's fourth-calf mama JRI Ms Lucky Strike 406D58 flat knows how to raise babies just like her honored Dam of Merit grandams. Ms Lucky Strike's fall 2019 son JRI Beef Producer 406G68 hammered the actual weaning weight scales at 1,015 pounds and the meatwagon flat crushed the yearling weight scales at 1,313 pounds. (RC)

JRI Good Instincts 285H34K nursed an 8-year-old Dam of Merit honored dam with a truly perfect teat and udder system. Good Instinct's Dam of Merit dam JRI Ms Mytty In Focus 285Z24K produces meat machine sons with added carcass value and oh my, 285Z24K's daughters are fertile calf raising machines. One such daughter of 285Z24K would be JRI Ms Secret Instinct 285E34K (full sib to Good Instincts) and her first baby 285G44 sold in last spring's bull sale with a 72# birth weight, whopping 930# actual weaning weight with a scalebusting 1,327# yearling weight. As mentioned above, 285Z24K is injecting added carcass value into her sons as to date her four sons all have posted 4.0 or higher IMF scores. (RC)

JRI Status Quo 017H304 ET would be an ET son out of JRI Ms First Priority 017Y20 Judd Ranch's awesome 9-year-old Dam of Merit honored donor female. Ms First Priority's first natural born son JRI Irresistible 017C30 sold in the 2017 bull sale and the beefpacker featured a 73# birth weight with a whopping 906# actual weaning weight. Ms First Priority's last natural born son JRI Paragon 017G30 sold in last spring's bull sale as Lot 177 and the beefpacker featured a 79# birth weight with a whopping 974# actual weaning weight. As noted, Ms First Priority flat knows how to get pregnant and bring home the beef. It's no surprise, Ms First Priority is following in the footsteps of her dam 017W90 and grandams 017H7 & 017Y5 who have both claimed Dam of Merit and Dam of Distinction honors. (RC) (HP)

This will be the first offering of SAV Catalyst 6704 sons and Catalyst's ability to produce beef-packing machine sons comes as no surprise as Catalyst is a son of the all-time Angus breed leader SAV Resource 1441. JRI Catalyst 56H271K nursed a 6-year-old calf raising machine Pedro daughter. Catalyst 56H271K flat hammered the 365-day weight scales at 1,384 pounds and note Catalyst's feed conversion on gain test as the beefpacker posted a 7.08# ADG. Now pencil-in Catalyst's mighty impressive scan data as the beefpacker scanned a big of 15.3 yearling ribeye with a sale leading 4.5 IMF.

JRI Explorer 270H300 was twin born so Explorer's 50# birth weight does not spell "heifer bull" genetics. Explorer nursed a 6-year-old fertility-plus 368-day annual calving interval mama with an awesome teat and udder structure. Explorer's 6-year-old mama 270B20 flat knows how to raise babies. 270B20's awesome 2019 heifer calf JRI Ms Triple Threat 270G30 featured an 84# birth weight with a whopping 757# 205-day weight. 270B20's powerhouse 2018 son JRI Saturday Night Special 270F20 sold in the 2020 bull sale with a calving ease 77# birth weight coupled with a whopping 801# 205-day weight. Rest assured, the producing ability is bred-in 270B20 as this gal features a performance-plus 105 weaning weight ratio on her babies.

Wow, if you want to flat boost your performance, fertility and carcass merit levels JRI Rockefeller 3H271 should really benefit your program in all three of these mighty important traits. Let's touch on performance first as Rockefeller pounded the actual weaning weight scales at 1,065 pounds and the meatwagon crushed the yearling weight scales at 1,314 pounds. Rockefeller nursed a 7-year-old fertility-plus 2021 Dam of Merit mama, so rest assured, the fertility-plus genetics are bred-in. Carcass merit rounds out the trio of profitable traits listed above and Rockefeller's progeny should garner plenty of carcass premiums with the carcass-plus 15.1 square inch yearling rib-eye and 4.0 IMF Rockefeller scanned.

JRI Cowboy Revenge 230H282 nursed JRI Ms Butterscotch 230Y82 a 9-year-old fertility-plus 2021 Dam of Distinction Top Recruit daughter. Ms Butterscotch's Dam of Distinction sons have definitely no surprise as her seven beefpacking machine sons have averaged a whopping 940 pounds on actual weaning weight. Ms Butterscotch's 2019 son JRI Pinnacle 230G22 sold in last spring's sale with an 81# birth weight coupled with a scalebusting 1,000# actual weaning weight. Ms Butterscotch's 2017 son JRI Rev'd Up 230E28 sold in the 2019 sale and the beefpacker hammered the actual weaning weight scales at 1,045 pounds. Cowboy Revenge should flat boost your performance levels, not to mention the fertility impact this cow family offers your program. (HP)

JRI Commander 214H202 probably does not offer you as much performance, but Commander more than makes up the difference in the more profitable traits of fertility, longevity and test/udder quality. Fertility alone has been documented as 12 times more economically important and when you add, longevity and superior test and udder quality you're looking at big time advanced profitability genetics. JRI Commander 214H202 nursed a 7-year-old mama with a fertility-plus 362-day annual calving interval and Commander's 7-year-old dam possesses a perfect test and udder structure. Rest assured, the longevity is bred-in as Commander's grandam 214T802 sports a 366-day annual calving interval at 13 years of age.

JRI General Lee 017H55 ET would be an ET son out of JRI Ms Jewels 017X10 Judd Ranch's phenomenal 10-year-old donor female. Ms Jewels has been honored as a Dam of Merit and/or as a breed elite Dam of Distinction female in every year of eligibility (15 thru 21). Ms Jewels unbelievable fertility and producing ability comes as no surprise as her 15-year-old dam JRI Ms Amber 017S9 sports an amazing 365-day annual calving interval and Ms Amber is still bringing home scalebusting weaning weight babies every year. Turn to page 12 and you can check out a photo of Ms Amber with one of her scalebusting bull calves.

JRI Wilson 47H230 nursed a first-calf purebred Red Angus mama who is mighty fertile as she shortened her gestation by 12 days with her fall 2021 baby. Judd Ranch's purebred Red Angus herd is small in comparison to their breed leading Dam of Merit Gelbvieh and Balancer program but I can tell you, it's built around the same principles of fertility-plus/calf raising machine genetics that excel in the teat and udder department on the maternal side. Speaking of teat and udder excellence check out Wilson's purebred Red Angus grandam photographed above. Oh I might add, the cow efficiency runs mighty deep in this 47 cow family as Wilson weaned off at 71.7% of his first-calf dam's 1,220# bodyweight.

If you're searching for a "heifer bull" add JRI Heyrend 246H310 to your search list. Heyrend's 67# birth weight indicates superb calving ease and note Heyrend features top 2% calving ease EPD strength to assure you the calving ease is bred-in. Heyrend nursed a beautiful first-calf heifer out of Judd Ranch's prolific 246 cow family which already features 24 Dam of Merit daughters. Five of those Dam of Merit honored 246 cow family daughters would be Heyrend's grandams' 246P11, 246M9, 246H8, 246C6 & 246A5. With five generations of Dam of Merit honored females on Heyrend's maternal side, Heyrend's replacement daughters should be fertile/calf raising machines.

What a super stud to lead off the spring yearling black polled purebred offering and producers, if you like big ol' juicy ribeye steaks, Saratoga's progeny should keep you well supplied. JRI Saratoga 254J300 excels in all the profitable traits: calving ease deluxe 84# birth weight, whopping 797# 205-day weight, and the super stud crushed the 365-day weight scales at 1,397 pounds. Now pencil-in Saratoga's humongous 18.6 square inch yearling ribeye, carcass-plus 4.4 IMF, feed efficiency plus 5# ADG, and note that Saratoga is well equipped with a big ol' 38.2 centimeter yearling scrotal circumference. Saratoga nursed a calf raising machine third-calf mama and Saratoga's phenomenal stats come as no surprise as his grandams' 254Z8, 254N72, 254E52, and 254C4 all bestow numerous Dam of Merit honors. Producers, if you're in need of improving the teat and udder structures in your program, JRI Private Eye 53J197 ET should make major advances in that department. Private Eye would be an ET son out of JRI Ms Paris 53B97, Judd Ranch's awesome 7-year-old donor female. Ms Paris possesses a flawless teat and udder system and oh my, Ms Paris is one fertile machine with a remarkable 355-day annual calving interval. Fertility runs mighty deep in this prolific 53 cow family as to date, thirty-two 53 cow family daughters have been honored as Dam of Merit females and every one was Judd Ranch born and raised. As mentioned above, Private Eye should be a big-time teat and udder improver as his dam possesses a flawless system and the General Patton daughters feature incredible teat and udder structures.

Oh man, check out the awesome stats on this beefpacker: calving ease 85# birth weight, whopping 1,221# 365-day weight, and the beefpacker flat converted the roughage with a feeder delite 4.43# ADG. JRI Reliabull 270J457 nursed a first-calf heifer with a beautiful teat and udder (99 teat & udder score) and man oh man, this prolific Judd Ranch 270 cow family flat knows how to get pregnant and bring home the beef. To date, fifty-eight 270 cow family daughters have been honored as Dam of Merit females. No doubt one of my favorite Dam of Merit honored 270 cow family daughters would be JRI Ms Pd Blackstar 270K75, Reliabull's Dam of Distinction honored granddam. Ms Pd Blackstar produced 39 natural and ET born calves for Judd Ranch and you bet, Ms Pd Blackstar possessed a beautiful teat and udder system.

Oh my, you talk about a performance machine that's well equipped with all the profitable traits! JRI Raphael 254J484 ET would be an ET son out of JRI Clementine 254Z8, Judd Ranch's phenomenal donor female. Clementine has been honored as a Dam of Merit (16-20) and breed elite Dam of Distinction (2021) female in every year of eligibility. Clementine's Dam of Merit/Dam of Distinction honors are truly remarkable when you consider Clementine has produced 21 ET calves besides her 8 natural born calves. Don't shy away from Raphael's 95# birth weight as Raphael features top 15% calving ease EPD strength and any geneticist will tell you that calving ease EPD strength is three times more accurate in predicting a bull's calving ease than actual birth weight. Turn to page 71 and you can check out one of Clementine's sons above Lot 273 and that powerhouse sold in the 2019 bull sale.

Producers, if you're searching for a "heifer bull" then JRI Royal T 285J459 should be a sleep all night "heifer bull". Royal T's 72# birth weight indicates big-time calving ease genetics and note Royal T features top 1% calving ease direct EPD strength. Before posting a bull as a "heifer bull" I like to research the dam's birth weight track record on her babies. Royal T's third-calf dam definitely excels in producing "heifer bull" type genetics as her first two babies only weighed 63 and 65 pounds at birth. Producers, rest assured, fertility runs mighty deep in this prolific Judd Ranch 285 cow family as to date forty-nine 285 cow family daughters have been honored as Dam of Merit females and everyone carried the Judd Ranch brand. You can check out one of Royal T's grandams photographed at 9 years of age on page 57 above Lot 215 and oh my, note her teat and udder excellence.

Check out the widespread birth to growth stats on this beefpacking machine Alan son: calving ease deluxe 70# birth weight coupled with a whopping 845# actual weaning weight off his second-calf mama. JRI Above N Beyond 207J431's second-calf dam is two for two in raising widespread birth to growth sons as her son JRI On The Rocks 207H331 sold in last year's sale with a 79# birth weight coupled with a scalebusting 1,269# 365-day weight. This Judd Ranch 207 cow family flat knows how to raise babies and get pregnant as Above N Beyond's second-calf mama possesses a 365-day annual calving interval. You can check out two of Above N Beyond's grandams' 207Z23 photographed on page 36 and 207U33 photographed at the top of page 42. Oh, I might add, grandam 207U33 sports a whopping 989# actual weaning weight average on her 6 sons.

Check out this meat machine General Patton son and producers, JRI Protege 270J37 was a member of Judd Ranch's 2022 National Champion Pen of 5 Purebred Bulls in Oklahoma City. Protege's second-calf dam JRI Ms Heart Breaker 270F37 flat knows how to raise babies and she's mighty efficient as Protege pounded the actual weaning weight scales at 885 pounds and that 885# figure equates to 73.4% of Ms Heart Breaker's 1,205# bodyweight. Ms Heart Breaker's big time producing ability and cow efficiency comes as no surprise as her grandams' 270M671, 270E67, 270X5 & 270T were four of the all-time great donor females at Judd Ranch. In total, these four prolific donor females produced a record 171 natural & ET born calves and the 171 figure is not a typo.

If you're a history buff, check out JRI Prince Charming 634J41's maternal ancestry. If you research Prince Charming's maternal side, his great, great grandam Miss Vrani was the first Gelbvieh female imported in the USA back in the early '70s. Miss Vrani was a fertility-plus/ maternal machine and her daughters and granddaughters have followed in her footsteps. Three of Miss Vrani's granddaughters would be Prince Charming's grandams' 634X81, 634F6, and 634D6 and these fertility-plus/ calf raising machines are all members of Judd Ranch's Dam of Merit sorority. Producers, profitability in the beef industry all starts in the fertility department and it's been documented that fertility is 12 times more economically important than growth, carcass, and etc. At Judd Ranch, you're buying into the breed's No. 1 Dam of Merit program for 21 of the past 24 years and Dam of Merit honored females are the breed's elite unmatched fertility females.

What a super stud to add to the spring yearling black polled Balancer offering and producers, JRI Peterbilt 254J373 is a member of Judd Ranch's 2022 National Champion Pen of 3 Balancer Bulls. Peterbilt nursed an awesome first-calf heifer with a picture-perfect teat and udder system (99 teat and udder score). Peterbilt basically tried to set all the records in the profitable traits: calving ease 86# birth weight, whopping 960# actual weaning weight, scale crushing 1,472# yearling weight, big dog 42.3 centimeter yearling scrotal, big time 5.48# gainer, and note Peterbilt's big ol' 16.0 square inch yearling ribeye. Peterbilt's first-calf mama flat knows how to raise babies and she's mighty efficient as Peterbilt's whopping 960# actual weaning weight equates to 76.5% of first-calf mama's 1,255# bodyweight.

Wow, check out the phenomenal stats on this meatwagon Resource son: calving ease deluxe 81# birth weight, whopping 925# actual weaning weight off his second-calf dam, and the meatwagon crushed the yearling weight scales at 1,334 pounds. Now pencil-in this meatwagon's huge 41 centimeter yearling scrotal, feeder delite 4.37 ADG, big ol' 16.1 square inch yearling ribeye, with a carcass-plus 4.2 IMF. JRI Romancer 140J242 posted phenomenal stats and wows, Romancer's second-calf dam is flat loaded with cow efficiency as Romancer's 925# actual weaning weight equates to 91.1% of his second-calf dam's 1,015# bodyweight. Producers, that's flat called unbelievable cow efficiency and I might add that Romancer's second-calf mama possesses an awesome teat and udder system (99 teat and udder score), (RC)

Oh my, if you like big ol' juicy ribeye steaks the progeny out of this beefpacker should keep your freezer well supplied with the humongous 18.2 square inch yearling ribeye this beefpacker scanned. JRI Allegiance 254J370 basically has all the profitable traits covered as the beefpacker crushed the 365-day weight scales at 1,312 pounds, sports a big dog 39.2 centimeter yearling scrotal, feed efficiency plus 4.68# gainer and as noted above, you should be looking at big time carcass premiums. Allegiance's second-calf dam flat knows how to raise babies which comes as no surprise as her grandams' 254U67 & 254C4 are both elite honored Dam of Distinction females. Beefpacking machine genetics and by the way, I'm always available for a big ol' juicy ribeye steak. (RC)

This beefpacking machine Alan son does possess a little more birth weight but man, he offsets the birth weight with all the other profitable traits. JRI Alan 207J35B weaned off his fertility-plus/calf raising machine 5-year-old Dam of Merit mama at 935 pounds and the beefpacker pegged the 365-day weight scales at 1,256 pounds, so rest assured, the fertility and performance are bred-in. Alan's Dam of Merit mama JRI Ms Sweet Pea 207D35 flat knows how to raise beefpacking machine sons as this is her fourth son in a row and producers, Ms Sweet Pea's four beefpacking machine sons have averaged a whopping 1,234 pounds on yearling weight. Ms Sweet Pea's Dam of Merit honors come as no surprise as her grandams' 207M5 & 207C4 were both honored as Dams of Merit and as breed elite Dams of Distinction.

Judd Ranch's program is built around fertility-plus/calving ease genetics and you'll really see the benefits when you get Judd Ranch sired replacement daughters in your breeding program. JRI Insight 213J38 nursed a 6-year-old fertility-plus Dam of Merit mama JRI Ms Felicia 213C28 who flat produces beef machine sons. Ms Felicia's son JRI In Charge 213H381 sold in last year's sale as Lot 263 and the meat machine featured a 79# birth weight with a scalebusting 1,283# 365-day weight. Ms Felicia's awesome producing ability and fertility levels come as no surprise as her dam 213A98 and grandams' 213T87 & 213G57 are all members of Judd Ranch's honored Dam of Merit sorority. You can view a photo of one of Insight's Dam of Merit grandam's 213A98 on page 23 and producers, 213A98 is an ET full sister to Judd Ranch's calving ease/powerhouse herd sire General Patton. (RC)

JRI Blue Blood 213J375's title Gray Homozygous Polled (71%) Balancer is correct as Blue Blood is gray hided and gray hided bulls carry the dilutor gene, much like all purebred Charolais genetics carry the dilutor gene. Blue Blood nursed a calf raising machine 7-year-old Pop A Top daughter JRI Ms Paris 213B75 ET who flat knows how to raise powerhouse sons. Ms Paris' 2020 son JRI Bar None 213H25 sold in last year's sale as Lot 288 and producers, the meat-wagon weaned off Ms Paris at a whopping 955 pounds and flat crushed the 365-day weight scales at 1,349 pounds. Ms Paris' ability to raise powerhouse sons comes as no surprise as her donor dam 213P64 and grandam 213G57 were both honored numerous times as Dam of Merit females. Producers, on black females Blue Blood will produce gray hided calves which the feedlot industry really likes.

Put an asterisk in your sale catalog by this ET son out JRI Ms Faithful 270Y25 Judd Ranch's awesome 10-year-old donor female as JRI Preference 270J353's nursed a really sucky recip dam. I can tell you Preference's 10-year-old donor dam flat knows how to raise babies and she's mighty efficient in raising them. Ms Faithful's first baby JRI Secret Potential 270A36 sold in the 2015 bull sale with a 74# birth weight and producers, the meatwagon posted a whopping 905# actual weaning weight and the 905# figure equated to 80.8% of Ms Faithful's 1,220# bodyweight. Ms Faithful's son JRI Secret Instinct 270C35 sold in the 2017 bull sale and producers, the meatwagon featured an 85# birth weight, whopping 1,002# actual weaning weight with a scalebusting 1,252# 365-day weight. Here's an opportunity to buy a diamond in the rough out of one calf raising machine mama.

JRI Precision 270J351 would be an ET son out of JRI Ms Faithful 270Y25, Judd Ranch's awesome 10-year-old donor female. I can tell you Ms Faithful is mighty fertile as she features a 367-day annual calving interval and producers, that is truly remarkable when you consider Ms Faithful is also producing ET calves besides her 9 natural born calves. Ms Faithful flat knows how to raise babies and she's loaded with cow efficiency. Ms Faithful's first baby JRI Secret Potential 270A36 sold in the 2015 bull sale with a whopping 905# actual weaning weight and the 905# figure equates to 80.8% of Ms Faithful's bodyweight of 1,220 pounds. Bringing home scalebusting genetics is the norm for Ms Faithful as her son JRI Secret Instinct 270C35 sold in the 2017 bull sale with a scalebusting 1,002# actual weaning weight.

Somehow JRI Overloaded 132J42's birth weight did not get recorded but I can guarantee you he was weighed as I've watched Judd Ranch weigh more calves at birth in one day, then my fifty plus years traveling around the country. JRI Overloaded 132J42 nursed a 4-year-old calf raising machine mama who has actually been a birth weight moderator as her first two babies only weighed 69 & 76 pounds at birth so rest assured, calving ease is bred-in. Overloaded posted an excellent growth spread which comes as no surprise as his grandams' 132U32 & 132J61 were both honored numerous times as Dam of Merit females. Please note, Overloaded's 365-day scan data is an estimate as Overloaded was too young for the American Gelbvieh Association to compute.

## Judd Ranch Customers Profit from Selling on the Grid

Judd Ranch bull customers who have been following their Gelbvieh-influenced and Balancer-influenced fat cattle on the rail and selling on the grid have found that their Judd Ranch-influenced Gelbvieh- and Balancer-influenced cattle outperform the U.S. industry average of 7 to 8 percent Prime and 70 percent Choice.

**Travis Olson**, Triple O Ranch, South Dakota has been purchasing Judd bulls for six years when wanting it all - performance (pounds) and carcass quality - Travis started his search for a new bull supplier for his family's 300 head Angus-based females. This led him to making the 600-mile drive to Pomona to check out the Judd Ranch program. Impressed with what he saw, the Olson's have been a customer ever since. Travis says the Judd bulls increased averaged finished weights 50 to 75 lb. per head. That's more than 15,000 total pounds - money in the bank. As farmer-feeders, the family's goal is to finish calves at 13 months of age. The family is excited about the carcass results of their 2020 calf crop that averaged 86% Choice or higher. Sold on the Judd Ranch program, Travis summarizes, "If you are feeding and finishing straight Angus cattle, I highly recommend you try a Judd Ranch Gelbvieh bull and see how much you will gain."

### 2021 Triple O Ranch Carcass Data - All sired by Judd Ranch bulls

Avg. Harvest Weight		Avg. ADG	Avg. Yield	Avg. Quality Grade
155 Heifers	1,300 lb.	3.33 lb./day	63%	87% Choice or better
145 Steers	1,425 lb.	3.65 lb./day	63.25%	86% Choice or better

**Gerald Merz** from Missouri has had a similar "happy camper" experience selling his Gelbvieh- and Balancer-influenced fats on the grid. Every steer in Gerald's first load of 36 head of fats in 2018 graded Choice or better, with 14 of the 36 grading Prime and 11 qualifying for the CAB program. Sired by Judd Ranch purebred Gelbvieh bulls and out of Angus cows, these steers were what Gerald calls "the industry's highly desired Continental X British crosses." In another group of Judd Ranch Gelbvieh- and Balancer-influenced fats, 11 out of 18 went Prime and four or five went CAB. All were Choice or higher. The Missouri cattleman's formula for success: Judd Ranch purebred Gelbvieh and Balancer bulls on Angus and Angus X Judd Ranch-influenced females. "I've been using performance bulls for more years than I can count and have been retaining ownership and selling on the rail for 15 to 20 years. I figure I can either get paid for my better genetics or someone else will," Gerald explains. "With the dryness, I've been weaning the middle of August. The calves go on silage and a little corn. They stay on that ration, and I increase their corn as they get bigger. They're 17 to 18 months old when they are harvested. "As the kill sheets show, Judd Ranch Gelbvieh-sired and Balancer-sired cattle are definitely performing mighty fine on the rail for me."

**Bill and Kathy Stoltz**, BK Ranch, Wisconsin, are among the cow-calf producers who expect more from their Gelbvieh-influenced cattle and simply wouldn't be happy if only 7 to 8 percent of their fat cattle went Prime. "We're getting right at 50 percent Prime, and it's been a long time since we had any cattle grade less than Choice," Bill explains. The cattle that have been performing so well on the rail for Bill and Kathy are "more Gelbvieh than anything else." The Stoltz's cow herd has a "bit of Angus" in them and a whole lot of Judd Ranch Gelbvieh. Bill adds that, the last five to six years, they have been using purebred Gelbvieh bulls. "If people think Gelbvieh and Balancers won't grade, then they might want to pick different bulls," Bill interjects. "A lot of how cattle grade hinges on picking the right bulls. I am really fussy about buying bulls with good carcass values, and that has been paying off."

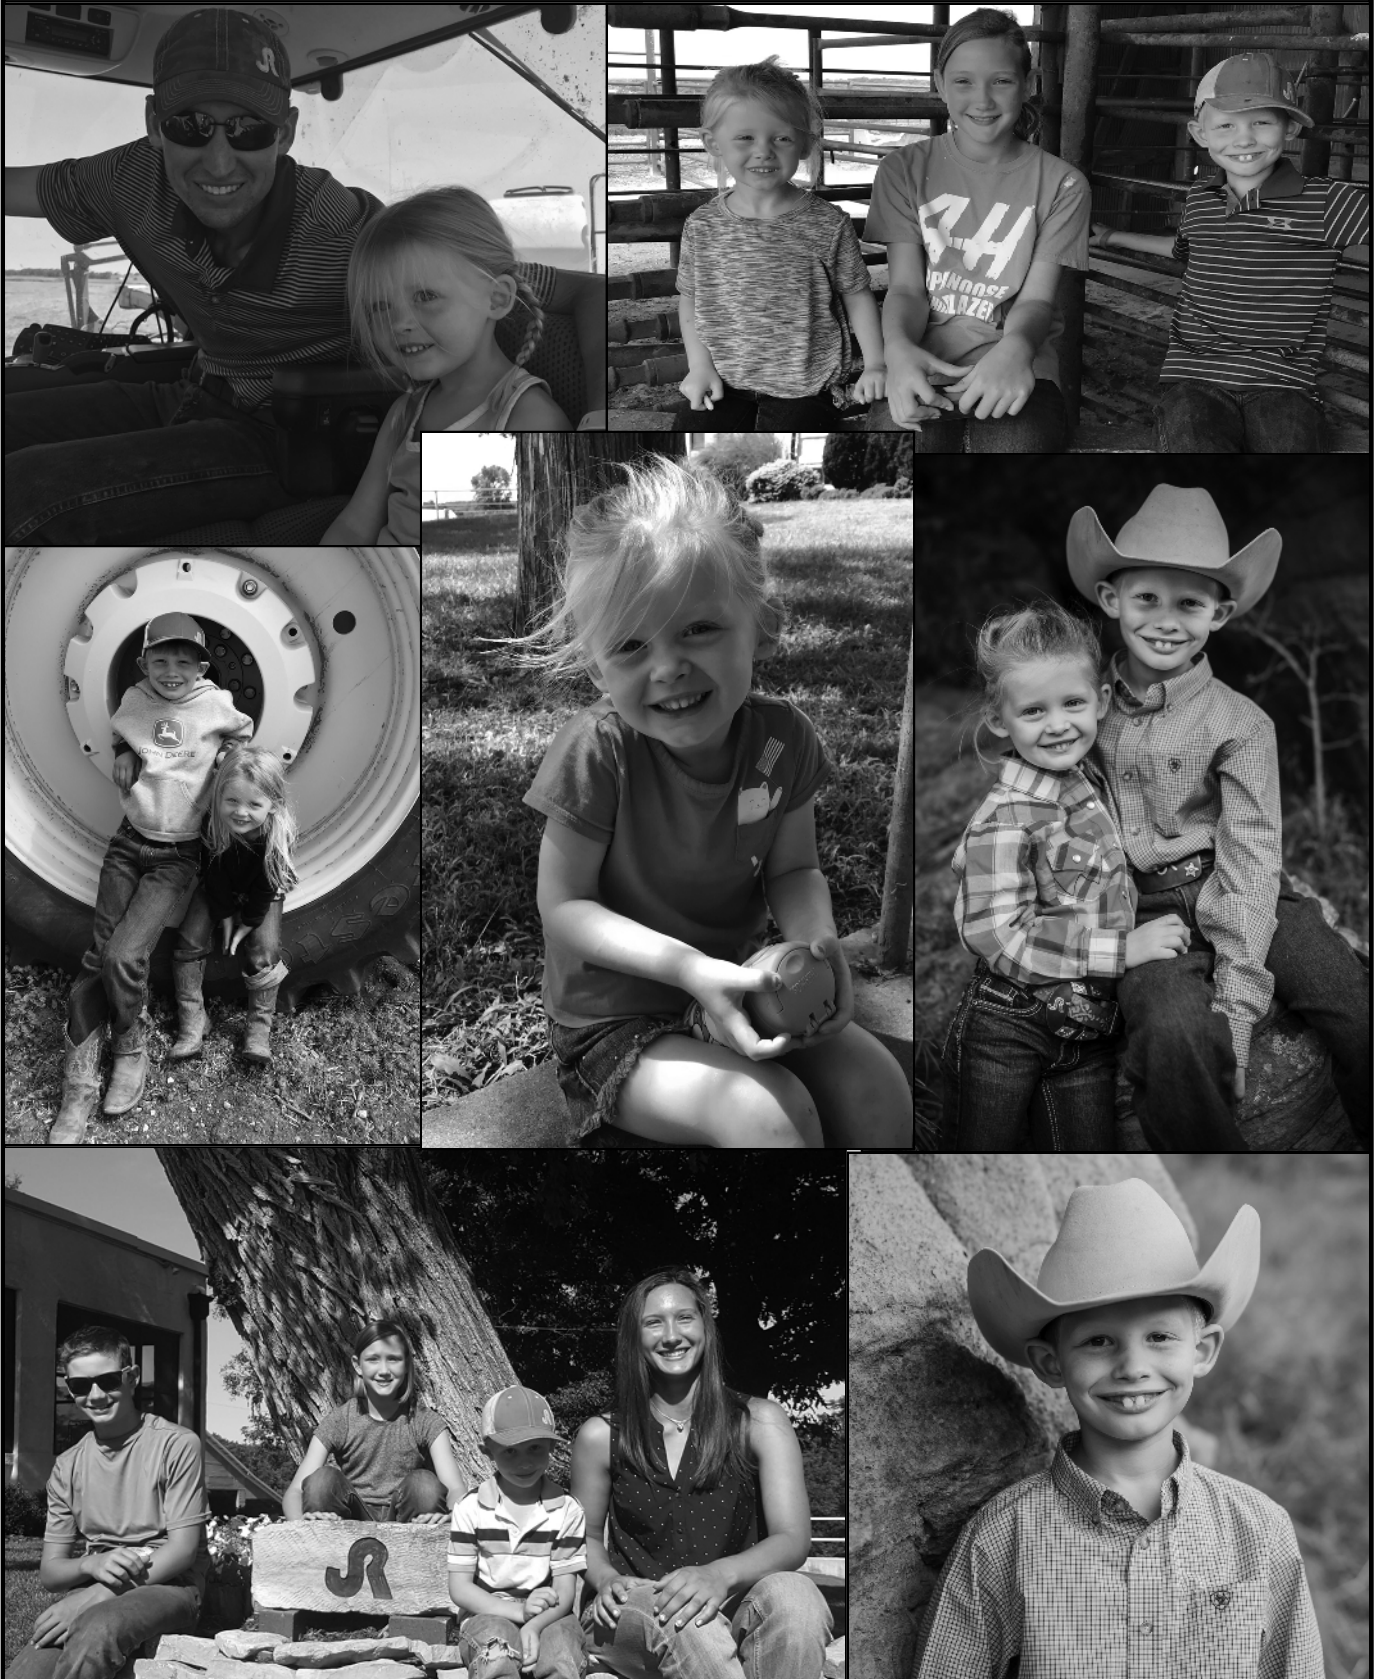

**Tracy Lake**, a cow-calf producer from Idaho, has been using Judd Ranch bulls for close to 20 years. He's also been feeding out cattle and selling them on the grid for the same amount of time. His 1,500 head of mother cows are black crossbreds, primarily Gelbvieh X Simmental or Gelbvieh X Angus. Using Charolais bulls on his Judd Ranch-influenced Gelbvieh cross females, his calves are averaging 61 to 64 percent on yield. Tracy estimates that, on average, his steers hit about 10 percent Prime and 70 percent Choice — or better. "Genetics are important, and feed is equally important," he tells. "We like to turn over the cattle. As soon as we think they will grade, they sell on the grid." Tracy attributes being successful on the grid to two factors: genetics and feed. And he's adamant that it takes a darn good cow to produce a good calf that performs start to finish. "We love our Gelbvieh-influenced cows," he continues. "I can't say enough good about our Gelbvieh crossbred cows. Their calves perform well on the rail."

**Mark Wray** started feeding cattle when he got out of college. At first, he purchased what he thought were "really good calves" from the auction barn. But, despite the calves being Angus, he said they were missing the boat when they hung on the rail. "Then I heard a guy giving a presentation say that the best animal you can feed is a Continental X British cross, and that got me to thinking," Mark elaborates. "I knew Judd Ranch just down the road had the best Continental cattle out there and I could raise my own cattle and benefit from selling them on the grid. Plus, I could improve my cow herd at the same time. "So, I started buying Judd Ranch bulls — purebred Gelbvieh — and putting them on our 300 Angus mama cows. I knew that with Judd Ranch bulls I would get bulls that excel in maternal traits and growth traits and my calves would be that highly desired Continental X British cross." This commercial cowman from Kansas says his first set of home-raised Judd Ranch-influenced Continental X British cross calves hung on the rail "really well." "But the big benefit to using Judd Ranch bulls was once my Judd Ranch-influenced heifers were in production," he explains. "For the past three years, I've been putting Judd Ranch Balancer bulls on my crossbred (Angus X Gelbvieh) females and 'Wow!'. Our yield on those calves went up a full percent. "That's a \$20 to \$30 a head premium." Mark adds that, year in and year out, 10 to 11 percent of his calves are grading Prime and another 80 percent are grading Choice. That's 90 to 91 percent consistently grading Choice or better. He points out that Judd Ranch genetics are giving him the yield he needs to sell on the grid, without sacrificing quality grade. "We've been using Judd genetics to make better mama cows, and we're picking up some yield at the same time," Mark states. "The myth out there that Gelbvieh or Balancers won't sire calves that will work on the grid is not accurate. It's just that — a myth. It's a false belief. "Our calves and the premium we've been getting are proof that Gelbvieh-cross and Balancer-cross calves work on the grid. Heck, I sure enjoy that extra \$20 to \$30 per head."

## Sale Notes

### **Increase Calf Crop Profit Using Homozygous Polled Bulls**

Judd Ranch is always striving to add more value to your next calf crop. Homozygous polled bulls can reduce management issues and increase the value of your calves in the marketplace.

Tom Troxel, Arkansas extension beef specialist, says research shows that horned calves marketed at weaning age were discounted \$8/ cwt. On a 500-weight calf, that's \$40 removed from your pocket when you sell a horned calf. Turn the scenario around. That means if you sold polled calves, no discount would have occurred and you would benefit with getting that \$40 per head in your pocket. On a group of 50 calves, that's an additional \$2,000.

Data collected from nine Texas livestock auctions on 1,420 lots with 7,073 head shows that polled calves sold, on average, for \$22.87/cwt. more than their horned counterparts. That's \$114.35/head. On a group of 50 calves averaging 500 pounds/year, we're talking an additional \$5,717.50 just for selling polled or dehorned calves.

**277 of the 293 Judd Ranch bulls selling on March 5 are Homozygous Polled.**
